Our Training Program

Our training instructors are current inspectors and software users with years of practical experience between them. We offer ongoing support after courses end and several of our courses are customizable to meet your organization's needs and challenges.

We have dedicated CMM and vision training rooms that typically allow us to accommodate a 1:1 student to machine ratio and 4:1 student to teacher training. PQI also hosts seminars and lunch and learn events in our expanded training facility. Custom and onsite training is also available.
